Please use the nutrition and allergen information in this section to help you make your dining decisions. While we are committed to providing as accurate nutrition information as possible, there may be differences between the actual nutritional content of your freshly prepared menu item and the nutritional values provided in this document. The nutrition information provided has not been reviewed by a doctor and does not account for the natural variability that occurs within ingredients, variation that occurs due to the hand-crafted nature of each plate, or variation that may occur due to substitutions that guests request. As part of our commitment to you, we provide the most current allergen information available from our food suppliers on common allergenic foods. These foods include: egg, soy, wheat (gluten), fish/shellfish, and milk. Because we have multiple sources of allergens in our shared cooking and prep areas, including common fryer oil, we are unable to guarantee that any menu item can be completely free of allergens.
